SOCIAL SERVICES PROGRAM REPLACEMENT

The All Opportunities section of the Virginia Business Opportunities (VBO) Public Posting page now allows users the ability to search for a **Buying Entity** by entering in the entities name via the new search box using "type-ahead" functionality.

Notification Process Update - Buyer Solicitation Summary Email Eliminated

Buyers will no longer receive the email notifications with counts of vendors notified.

This information will continue to be available via the following: S&C - click the "Notifications" button inside the solicitation, VBO Buyer - click the "View Notifications List" or run the 402 & 403 Reports via Report & Resource Center, and QQ click "Vendor Notification" to see a list of vendors that were notified. Let eVA be your source of truth!

Resolving Errors: A new message will appear identifying which lines are missing required accounting codes. We believe this will be a big benefit for those who create large requisitions.

Copying PR Improvements: When a purchase requisition is copied, the Fiscal Year (FY) and PO Category values on the new purchase requisition will default with the BSO value or the field will be blank. Additionally, the contract number will be cleared and the drop down list updated on non-catalog items. This will improve data that is often not updated on a copied PR.

SAVE THE DATE

Next Buyer User Group Meeting

Thursday, December 12th @ 10am

A meeting invitation will be sent prior to the date.
